

Sustainability Update

CBCSD 11th Conference on Latest Trends of Sustainable Development---Economic “New Normal” and the Sustainable Development Pathway

Themed with “Economic “New Normal” and the Sustainable Development Pathway”, CBCSD’s 10th Workshop on Latest Trends of Sustainable Development was held in Beijing. More than 150 delegates from government, enterprise, intellectual, social organization participated in the conference on April 16 in Beijing.

Mr. Wang Zhongyu,
President of CEC and
former Standing Vice
Chairman of CPPCC

Seize Opportunity and Improve Capability to Deepen Sustainable Development

Enterprise should consider to explore the sustainable pathways actively under the new normal economy: 1. Draw a long-term blue print guided by the development plan; 2. Seize the opportunity brought by Internet Plus and enhance the capability and level of sustainable development; 3. Optimize industrial distribution and realize energy conservation and emission reduction; 4. Improve inner capability and use advanced management skills.

Mr. Wang Zhongyu, President of CEC and former Standing Vice Chairman of CPPCC; Dr. Dong-Soo Hur, Chairman of KBCSD; Mr. Su Wei, Director of Climate Change Department, NDRC; Ms. Fang Li, Assistant Secretary General of CCICED; Mr. Jiang Kejun, Director of Energy System and Market Analysis Research Centre, Energy Research Institute; Mr. Hao Jiming, Academician of CAE and Professor of Tsinghua University; Mr. Chen Liming, Chairman of IBM Greater China Group; Mr. Edward Yang, President of BP China; Jing Feng, Director of CAUPD respectively delivered speeches from the perspective of environment and development, smog prevention, carbon peak, sustainable cities and Internet+. With in-depth analysis and simple diction, they introduced the new trend and direction of climate change, GHG reduction and total emission control from the macro policy level and the practical level. They also provide new pathways for the implementation of sustainable development strategy under the new normal from different perspective. The conference was Moderated by Mr. Li Decheng, Standing Vice President & Director-General of CEC.

CBCSD 2015 AGM

On April 16, CBCSD 2015 AGM was held in Beijing, more than 70 leaders and delegates from its board and member enterprises including Sinopec, BP, Dupont, Novozymes and Veolia etc. were presented. Mr. Chen Jinhua, former Vice Chairman of the CPPCC National Committee and Honorary President of CBCSD, set a congratulatory letter. He emphasized that, New Normal calls for new actions, We now faced hard-won opportunities to boost sustainable development. Enterprises should stand at a higher position and hold sustainable development as their core strategy, to make contribution to the harmonious progress of our economy, society and environment.

Related Materials:

Congratulatory Letter from Mr. Chen Jinhua ([中文](#)、[English](#))

The AGM reviewed and approved the 2014 Work Review and 2015 Work Plan Report addressed by Mr. Wang Jiming, President of CBCSD, and CBCSD Financial Report of 2014 and Budget for 2015 addressed by Mr. Hu Xinxin, Secretary General of CBCSD and former standing Vice Chairman of CEC. The CBCSD AGM acknowledged CBCSD for its excellent role of platform to gather its board and member companies to promote the sustainable develop. CBCSD has strictly follow the Budget approved by the board council meeting, which ensure the 2014 projects were carried out successfully. In 2015, CBCSD will continue to increase numbers of the board and member companies, expand the project area, promote the sustainable development from enterprise perspective and strengthen the platform role, promoting more enterprises to go-out and improving their international influence.

DeTao Group and CADREG Had Officially Become CBCSD’s Members

DeTao Group and CADREG had officially become the CBCSD members and will serve as the expert enterprises to participant in CBCSD’s projects related to integrated reporting and building efficiency . By the end of April 2015, there are 70 members in CBCSD which covers dozens of industries including petroleum, electricity etc.

Signing Ceremony of the New CBCSD Members

Dr. Dong-Soo Hur,
Chairman of KBCSD

Stand Together Regardless of the Situations, Jointly Promote Sustainable Development by China and Korea

As the strong countries in Asia, China and South Korea should strengthen industrial links to stimulate the growth engine. CBCSD and KBCSD plan to held the China-Korea CEO Roundtable Meeting in July, which will be a new catalyst for expanding low-carbon trend and green business opportunity. It is a necessary platform to help find sustainable economic growing solutions.

Mr. Su Wei, Director of Climate Change Department, NDRC

Actively Adapt to the New Normal and Face the International Climate Change

We face new challenges and opportunities for addressing climate change: (1) Internationally, CO2 emission has taken a quarter of the world, and has become the focus of international negotiations; (2) Domestically, low-carbon development and GHG emission control are necessary and also the inner requirements to realize the sustainable development in China.

Mr. Jiang Kejun,
Director of Energy System and Market Analysis Research Centre, Energy Research Institute

Haze, Low-carbon and Energy Development

It is a right choice to use natural gas to substitute coal. From energy perspective, natural gas supply is going to reach 260 billion m3 in 2015. 2015 will be a practical year since we hope to see the prices of natural gas will reflect its cost. Renewable energy and nuclear power will offer great opportunities for GHG emission reduction.

Ms. Fang Li,
Assistant Secretary General of CCICED

Engaging Companies to Adapt to the "New Normal" of Environmental Cooperation

New Environmental Protection Law's ultimate target is to change the potential market into an obvious one. Local governments must consider environmental impacts while attracting investment in the future, since the paper will be accompanied by his life. "One Belt and One Road" and "Going-Out" are currently China's big strategies, and Green Finance will influence foreign investment and going-out strategies.

Sustainability Driven by Responsibility and Innovation: Practices of IBM

The difficulty for solving the sustainable development issue is to tackle the challenges of economic development, environmental protection, resources and energy sustainable development at the same time. Systemic tools are needed to address the systemic problems, which IT offers a solution. IT development is not just a simple quantitative change, but also an upgrading revolution. It has already impacted all the business, working and living modes.

Mr. Chen Liming,
Chairman of IBM Greater China Group

PM2.5 Air Pollution Prevention in China: Advances and Prospects

We must see the seriousness of PM 2.5 prevention and control. Standard is not enough, emission reduction is the only way. Only by reducing the emission by 30-60% from now on, can the air quality change significantly. It is an ongoing process with a long way to go. It is a shared responsibility of government, enterprise and the public, all region should face this together.

Mr. Hao Jiming,
Academician of CAE and Professor of Tsinghua University

2035 Energy Outlook

In terms of trade flow, we should adopt an open mind to conduct international cooperation and enhance the distribution efficiency of resources. In terms of energy structure, China should adjust the energy consumption structure, push the development of natural gas and clean energy, and decline the reliance on coal to adapt to development trend. In terms of sustainable development, we call for policy makers to take practical actions to provide support.

Mr. Edward Yang,
President of BP China

Urbanization Development Mode and Institutional Research based on the Concept of Ecological Civilization

Three suggestions for urbanization plan: (1) Identify the problems from an integrated space perspective and make development targets and limitations; (2) Set up a healthy tax system and adaptive development mode to leave enough space for future need; (3) Implement people-oriented urbanization, and strengthen the training of city planners, set up prize and punishment mechanism to build a publication and education system facing the public.

Mr. Jing Feng,
Director of CAUPD

[The Business and Climate Summit Will be Held in Paris Next Month](#)

As one of the key events in Paris Climate Week, the Business and Climate Summit is going to be held in Paris on May 20-21 next month. This summit was held by WBCSD and Global Compact and it is expected to invite thousands of business leaders, investors and decision makers to find the solutions from the international level perspective and help the low-carbon economy to transit, and it also serves as the preparation for the 2015 COP21 conference held 200 days later.

Summit Website: <http://www.businessclimatesummit.com/>

[Royal Dutch Shell Won Daimler Supplier Award 2014 in the Partnership Category](#)

The annual Daimler Supplier Award is designed to recognise outstanding performance. More than 450 top-level representatives of the most important Daimler suppliers attended this year's gala at the Mercedes-Benz Center in Stuttgart. A total of 10 suppliers were recognised in different Daimler Supplier Award categories. In the area of International Procurement Services, Shell won the award in the Partnership category for outstanding performance in the joint implementation of a lubricants after-sales business in China.

[Chemchina Attended the Conference on International Exchange of Professionals](#)

On April 18, the 13th CIEP was held in Shenzhen. Chemchina, as an important member of "SASAC-central government controlled enterprises section", participated in the conference. With the theme of Better Chemistry, Better Life, Chemchina showed the track records of international cooperation and talent introduction projects, which attracted experts from home and abroad to communicate.

[Integrated with International Innovation Resources, Foshan Industrial Cluster Built Smart Cities with De Tao Group](#)

On April 24, the Connection Fair of Foshan Industrial Cluster and De Tao on International Innovation Resources was held in Shanghai. Companies including the Ant Soldier and De Tao signed the strategic cooperation agreement. Both sides will display their resource advantage and accelerate the connection on brand upgrade, industry innovation plan and De Tao resource so as to promote the smart city construction and industrial upgrading.

[Baosteel Strived to Set a Iron and Steel Service Platform Ouyeyunshang](#)

On April 24, Chen Derong, President of Baosteel, expressed publicly on the 2014 Stockholder Conference and Presentation of Analyst Performance that, China's iron and steel industry have come to the crossroad of Internet+. Ouyeyunshang aims to serve as the integrated iron and steel service platform on e-commerce, logistics, data service and financial service, and leads to a new order of iron and steel distribution.

["Let's Partner on Climate Action. Now": Veolia Signs the Call by leading CEO's Committed to the Climate Change](#)

CEOs from 43 leading international groups in 20 different sectors with operations in over 150 countries, jointly generating over \$1.2 trillion dollars in revenue in 2014, are launching a joint initiative to lay down the bases for a global and responsible agreement on the climate, at the COP21 in Paris in December 2015. They will all sign an open letter to be sent to world leaders, inviting them to take hands-on decisions at the climate "COP 21" climate conference. Veolia CEO, Antoine Frérot, acting on behalf of our Group, is one of the members of the call "Let's Partner on Climate Action. Now." published and relayed in the Financial Times.

[Novozymes Bio-technology Helped Reduce 60 Million Tons of CO2 Emission](#)

In 2014, Novozymes bio-technology helped the industries across the world reduce 60 million tons of CO2 emission. Enzyme pharmaceuticals developed by Novozymes is a bio-catalyst and also one of the core technologies of industrial production. Adding enzymes into the industrial production could reduce the CO2 emission.

[Michelin Won the Best Supplier Award from Boeing Company](#)

On April 15, Michelin accepted the Best Supplier Award with other 13 companies and one university thanks to its outstanding performance. Boeing said, this award is the recognition of Michelin because whoever won the award is the outstanding one in the industry. Michelin also won the "Boeing Excellent Performance" Award.

[Nippon Won the 2014 International Best CSR Honor](#)

Recently, community care project of Nippon stood out among 100 cases and won the award of Ragan Awards "Best Annual CSR Project".

Urbanization and Ecological Civilization Construction

[2015 China International Urbanization Forum: Innovation and Practice](#)

On April 18, 2015 China International Urbanization Forum was held in Shanghai. With the theme of "Innovation and Practice", more than 500 delegates from home and abroad discussed with the theme of "One Belt and One Road", Yangtze Economic Belt, FTA construction, and new type of urbanization construction. Delegates shared development experience of cities and helped to improve the practical innovation of new urbanization.

Forum Website:

http://finance.sina.com.cn/focus/2015zgczhgcgjlt/?from=single_message&isappinstalled=0

[The 8th International Urbanization Summit Held in Beijing](#)

On April 30, the 8th International Urbanization Summit was held in Beijing with the theme of "New Type of Urbanization and Land Usage". Hu Cunzhi, Vice Minister of MLR and deputy director of CIUDSRC made a keynote speech named "Implement the strategy of saving first; improve the intensity cities development construction and green development". He proposed to make scientific planning and limit the traditional city building. He also said to make land support policy, stick to resource limitation so as to push the new urbanization construction.

[Green Building Material Evaluation Methods Management Detailed Rules for Implementation \(Draft for Comment\) was issued](#)

On April 9, MOHURD and MIIT jointly released the Green Building Material Evaluation Methods Management Detailed Rules for Implementation (Draft for Comment) and drafts for comment on green building materials thermal insulation material (wall and house), wall material (blocks), premixed concrete, building glass, ceramic tile (board), and sanitary ware.

[Green Building Material Evaluation Methods Management Detailed Rules for Implementation \(Draft for Comment\)](#)

[The State Council Implement the Development Plan for Yangtze River Middle Reaches City Clusters](#)

On April 5, the State Council signed to agree the Development Plan for Yangtze River Middle Reaches City Clusters. This is the first cross region city cluster plan the state council ever agreed after the country's new urbanization plan (2014-2020). The plan set six priorities: 1. Coordinate urban and rural development; 2. Infrastructure interconnectivity; 3. Coordinated development among industries; 4. Jointly build eco-civilization; 5. Share public service; 6. Deepen opening up to the outside world.

[Ministry of Finance and MEP Released Government and Social Capital Cooperation Implementation in Advancing the Water Pollution Prevention](#)

On April, the Ministry of Finance and MEP jointly released Government and Social Capital Cooperation Implementation in Advancing the Water Pollution Prevention, which provided several brilliant ideas on promoting water pollution prevention PPP project. Policy should also lean to the PPP project, such as including financial reward, investment subsidiary and government payment etc. It also encourages the social capital being used as the environmental protection fund especially for water pollution prevention PPP project.

[97 Cities Included in the National Smart City List](#)

On April 14, a list of 2014 national smart city pilot list was released. 97 districts, counties and towns including Mentougou district of Beijing were involved. Other 41 Projects were set as the special pilots. MOHURD and MOST released a statement about the detailed works related lately.

[MEP Released the Air Quality in 74 Cities and Key Places in the First Quarter and March, 2015](#)

The MEP released the 74 cities air quality including Beijing, Tianjin and Hebei Province; Yangtze River Delta and Pearl River Delta etc. in the first quarter and March, 2015. In March, average standard days hit 71.1%, slight pollution days hit 21.1%, mid-pollution and heavy pollution were 5.5% and 1.8% respectively; extreme pollution days were 0.5%. Among those pollution days, PM 2.5 is the primary pollutant, with PM 10 following.

[8 Cities Listed as Sino-Europe Low-carbon Eco Pilot Cities](#)

Recently, 8 cities including Qingdao, Changzhou, Hefei, Weihai, Zhuzhou, Liuzhou, Guilin and Fengxi passed the examination of MOHURD and EU, have officially become the pilot cities of China-Europe Low-carbon Cities Cooperation Project, which will conduct its work in intensive development plan, clean energy usage, green building, green transportation, water resources and water system, waste disposal, green industry development, city upgrade and historic sites protection.

Low-carbon Development, Energy and Climate Change

The State Council Released the "Ten Principles on Water"

On April 16, the State Council printed and issued the water prevention action plan, which said to limit the pollutant emission, promote economic structure upgrading, protect water resources, strengthen scientific support, display the market role and tighten the management of water environment condition.

[Shi Xiaojuan from MEP Analyses the "Ten Principles on Water"](#)

Bureau of Energy: Beyond 2020, New Energy Development will See a Peak

On April 15, [the 9th International New Energy Summit](#) was held. Liang Zhipeng, vice minister of National Energy Administration said new energy development will see a peak after 2020. New energy development in the Thirteen's Five Year Plan will be featured by: 1. Renewable energy will turn from supplementary of fossil fuels to substitute of fossil fuels; 2. Transition of renewable energy should be realized on the production side and solar energy generation should be the primal force of energies in production; 3. Renewable energy development will be adjusted according to regional condition; 4. Transition of renewable energy should be realized on the consumption side. Renewable energy should supply heat and supplement electricity.

National Carbon Market Roadmap was Clear

On April, 25, Global New Energy Development Report was released by Hanergy Holding Group Limited and New Energy Chamber of Commerce. China's carbon market was at a crucial stage in 2014, seven pilot provinces and cities finished their jobs, national integrated carbon market was on its way of establishment. According to the report, in 2014, secondary market in seven provinces and cities sales volume was 13.83 million tons, with 495 million RMB yuan. Among which, Hubei Carbon market is the most active one, accounted more than half of the sales volume.

2014 China Carbon Market Annual Report Released

2014 China Carbon Market Annual Report is a summarizing report conducted by Sinocarbon Innovation and Investment Co., Ltd. This is the second year of releasing. It includes major events in the 2014 carbon market, reviewed the development of carbon trading market and voluntary emission reduction trading market and also looked through the construction route of the national carbon market.

Download: <http://pan.baidu.com/s/1pJFRxX5>

Atmospheric Law is Expected to be Rectified this Year, CAAC Actively Provided Suggestions

CAAC, jointly established by a group of key scientific research institutions such as Tsinghua University, CAEP, EIA, Fudan University, Nanjing University, Beijing Normal University, CRAES, Peking University and Renmin University of China released the Atmospheric Law Compilation report. The rectification is expected to finish in this year.

Tiered pricing for electricity Seminar in Cement Industry Held

On April 29, Energy Conservation Department in MIIT and Price Department in NDRC held the tiered pricing for electricity seminar in cement industry, on which the people in charge introduced the policy background, overall plan, policy implementation procedure, standard and supporting systems for the cement industry to carry out tiered pricing for electricity. The participants discussed and exchanged views on the mechanism design, implementation, and the development trend of the cement industry.

The US Handed Over its GHG Emission Reduction Plan to the UN

The US government officially handed over its GHG Emission Reduction Plan to the UN on March 31, which said to reduce the GHG emission by 26% to 28% by 2025 compared with 2005. The White House said, this Plan was based on the China-US Joint Statement on Climate Change signed in last November when President Obama visited China, related reduction targets are included in the Joint Statement.

Japan Basically Drew the GHG Emission Reduction Targets, Still Fall Behind Others

On April, 23, Japanese government had officially entered into adjustment phase which is to reduce the GHG emission by 25% by 2030. Energy structure is the prerequisite of GHG reduction, the government had decided to use 20-22% of nuclear generation and 22-24% of solar power generation.

Figure 2: Aggregated trading volume and transaction volume in seven pilot carbon markets

Corporate Social Responsibility

[China CSR Top 500 Released, Chinese Companies Performed Well](#)

On March 27, China CSR Top 500 evaluation report was released in Beijing. It showed that compared with the international Top 500 companies, Chinese companies' performance is not inferior in any respect and they are leading in the finalist. Foreign capital companies, SOEs and private companies are neck to neck in implementing CSR.

Conference Website:

http://finance.sina.com.cn/focus/2015_zgqyshzr500q/

[Cement CSR under New Normal from the New Evaluation System Perspective](#)

In early April, China's Building Materials and Beijing East Junhe Management Consultant Company jointly issued [2014 Year China Cement CSR Evaluation List](#). This is the first CSR evaluation implemented by a third party professional institutions in the building material industry, and also the first CSR new evaluation system based on the big data.

The evaluation has realized three important innovations:

First, it is the first Cement CSR evaluation system with combination between internationalization and localization, as well as between standardization and industry-oriented;

Second, it is the first list reflecting the "Internet +" thinking and applying the big data;

Third, it does further objective analysis for the first time on the Cement CSR from four dimensions including corporate governance, economic performance, environmental impact and social impact.

[China Oversea's Mining Investment Sustainable Development Seminar Held in Beijing](#)

On April 29, CCCMC and GIZ (Germany) co-hosted the China Oversea's Mining Investment Sustainable Development Seminar in Beijing and shared their views on "responsibility, mutual learning, integration and development". They also offered their opinions on the solutions and suggestions and shares the best practices and experiences.

[Academy of Social Science: CSR Implementation should Down to Earth](#)

On April 28, experts and entrepreneurs gathered in Chengdu for "Sharing CSR—Public Benefit 2015" and discussed the roles companies played in implementing CSR. They believed that CSR should be down to earth and be the liaison in enterprise activities.

[CSR International Forum Held in Tokyo, Europe, US, China and ASEAN Country Companies Exchanged on the New Trend on CSR](#)

On April 28, Japan Civil Association held the CSR International Forum, on which the participants discussed the economic trend and the role CSR played in cross boarder communication. Delegates from US, China, Europe and ASEAN countries introduced the latest trend of CSR respectively and solidified on the consensus they had reached.

The Party Central Committee and the State Council Issued Opinions on Constructing Harmonious Labor Relationship : People-oriented, Protect the Interests of Employees and Enterprises

The party central committee and the state council has issued the Opinions on Constructing Harmonious Labor Relationship . The opinion is divided into eight parts of article 26, including the significance of building a harmonious labor relations, the guiding ideology, working principles, goals, tasks and policy measures. Opinions, points out that our country is in economic and social transformation period, the main body of labor relations and interests more and more diversified, labor relations contradiction has entered a highlight periods and seasons, labor dispute cases is high and in some places such as damaging the interests of the worker of wage arrears for migrant rural workers despite the outstanding phenomenon of collective shutdown and mass incidents happen from time to tome, the task of building a harmonious labor relations."Opinion" is a programmatic document guides the work of labor relations in the new period.
