

Sustainability Update

Comprehensive Progress Would Be Made as “Made in China 2025” Has Been Issued to Advance the Sustainable Development of Manufacturing Industry

On May 19th, the State Council of China officially published “Made in China 2025” agenda, which, at the first time, defines the comprehensive promotion of sustainable development of manufacturing industry as the foundation of country establishment, the instrument of national development, and the basis of state enhancement.

Firstly, “Made in China 2025” agenda emphasizes on the “three step” strategy. Via this, China will be able to transfer from a big manufacturing country to a excellent manufacturing country. And this also suits the strategy and timescale of “China Dream”. Secondly, “Made in China 2025” agenda clearly indicates four principles and five guidelines to promote the manufacturing’s sustainable development, and these would comprehensively implements the core spirit of the “China Dream”, Finally, “Made in China 2025” agenda names Five Projects and Ten Areas, of which provide specific measure and effective operation methods that are corresponded with China’s basic national conditions and reality of development for the implementation of “China Dream”.

Upcoming Event: “Eco Forum Global Annual Conference Guiyang 2015”. CBCSD Will Hold Two Sub-forms at the Conference: “Natural Capital Forum TV Summit” With De Tao Group and “Green Public Procurement” With ICLEI

“Eco Forum Global Annual Conference Guiyang 2015” is to be held during June 26th to 28th in Guiyang, Guizhou Province. The theme of the conference is “Embracing a New Era of Eco-Civilization: New Agenda, New Normal, New Action”. It is reported that this annual conference will discuss the ecological civilization construction focusing on Wild China and global sustainable development, to promote the “greening” in China. CBCSD will held the sub-forum “Natural Capital Forum TV Summit”: Invest Green Water and Mountain, Create Gold and Silver Mountain ”with DeTao Group, and held the sub-forum “Green Public Procurement” with ICLEI.

通过“三步走”实现制造强国的战略目标

《中国制造2025》明确了十大重点领域

《中国制造2025》明确了五项重大工程

Mr. Ban Ki-moon Calls on Business to Get into Actions for the New Sustainable Development Goals of United Nations

On May 19, Mr. Ban Ki-moo, U.N. secretary-general, said that the U.N. needed global business participation to promote the new sustainable development goals. Compared with the “Thousand Development Goals”, “Sustainable Development Goals” will cover every field of public life. He also called for business to actively participate in three important meeting to be held this year: Addis Ababa Development Finance Meeting in July, Union General Assembly in September, New York and Climate Conference in December, Paris.

[The World Business Summit on Climate Change Has Been Held in Paris](#)

On May 20th and 21th, the World Business Summit on Climate Change was held in UNESCO headquarters in Paris. Nearly thousands of business leaders, investors and policymakers from many countries got together, explored the climate change and sustainable development solutions from the global level, promoting low carbon economic upgrade into the enterprise actions. Concentrating on the issues of "promote low carbon construction solutions" and "policy guidance for realizing the low carbon society" respectively, the two-day summit shared the enterprises' practice experience and advice on promoting the low carbon economy transformation, to help the government make more reasonable policy to realize the carbon reduction goal while ensuring economic growth and promoting increase of employment. This summit will paved the roadbed for reaching a blinding agreement in Paris Climate Conference.

[China and South Korea Have Signed the Biggest Free Trade Agreement Ever](#)

On June 1th, China and South Korea government officially signed the "PRC and ROK Free Trade Agreement". This is the biggest trading agreement China had signed so far, along with widest issue range and highest trade value. The two countries will also deepen mutual cooperation in the new energy, air pollution and climate change fields, and provide new market growth opportunities for each other.

[CBCSD and KBCSD Cooperate to Impel Business Sustainable Development in Both Countries](#)

In July 15th to 16th this year, CBCSD and KBCSD will hold the first "China-Korea CEO Roundtable on Business Sustainable Development" in Beijing, it aims at setting up an regular exchange platform for the business leaders, government officials and other like-minded partners, to explore cooperation opportunities in the low carbon and green business field.

[CBCSD and Green Footprint Center Will Launch A Building Environmental Performance Pilot Project Soon](#)

Recently, CBCSD and Green Footprint Center officially signed a cooperation agreement that the two sides will jointly launch environmental performance pilot project.

CBCSD will introduce the environmental management platform widely used in North America and other regions and apply the innovative methods and practices to set up the building performance benchmarking. This project aims at promoting the development of a localization "Building Energy Efficiency Management Platform", strengthening the building efficiency management, and helping more owners understand their buildings' energy consumption.

[China and India Have Issued A Joint Statement on Climate Change](#)

On May 15th, China and India issued the joint statement on climate change in Beijing, which declares that the two countries are sparing no effort to prepare the contribution related to the 2015 agreement which decided by their respective country, endeavouring to summit to the Paris Conference as soon as possible. The two sides will fully support the success of the Paris Conference hold in the end of this year.

[The International Low-Carbon Forum Is Tentatively Scheduled in June](#)

The third Shenzhen International Low-carbon Forum is tentatively scheduled in June 17th to 18th. It includes open ceremony, main forum, sub-forum and related activities. The theme of main forum is "Coordination and Management of different stakeholders under the same goal". There are 11 sub-forums including low carbon city mayor summit, new energy, low carbon industry and tsubochi. Related activities include low carbon model selection and prize, creative design award, etc.

[Overseas Investment of State Grid Entered Sustainable Development Era](#)

On May 19th, Brazil's beautiful mountain UHV power transmission project ceremony was held in Brasilia, which marked the "Go Out" breakthrough of China's UHV technology and it also indicated that the international strategy of State Grid had made some new progress. By the end of 2014, the total amount of foreign investment of State Grid already has amounted to \$29.8 billion.

[Schneider Electric Together With Pangu Data to Build Green Modular Data Center](#)

On May 19th, Schneider Electric and Shenzhen Pangu Data LTD jointly applied the leading micro module data center solutions to Pangu Guanlan Jinxiu Data Center, making this project become China's largest micro module data center/operation cooperation data center, with the highest standard of data center in China, and the first green ecological buildings pilot. It not only sets a good example for green efficiency construction, but also vigorously promotes the great-leap-forward development from internet ecosystem to the environmental protection and energy saving construction.

[Dow Chemical's Uses New Packaging Concept to Improve Its Capability of Sustainable Development](#)

In the 2015 International Plastic Exhibition, Dow Chemical displayed a new supply chain concept named by "Farm to Table". Based on which, Dow Chemical exhibited the sustainable solutions of advance plastic bag, which can be applied to the food and special package, adhesive, logistics package, agriculture and health. Dow Chemical believed that it can provide the company a more competitive advantage in today's competitive market by integrating biodiversity and ecosystem services into the management decision making and practice.

[BASF and Landsea Will Develop the Green Building Market Together](#)

On May 18th, Landsea green property and BASF held a seminar themed of "Intelligent Building" in Shanghai. Landsea is a leading green technology real estate development and operation enterprise, and BASF is a global leading enterprise in sustainable building industry. The two sides explored the solutions for the future community. This seminar aimed at discussing how the sustainable building idea can satisfy the future social, political, economic and technological challenges from perspectives of different stakeholders.

[DSM Technology Is Put on Display In 2015 International Plastic Exhibition](#)

As a global leading company of life science and material science, the Dutch royal DSM group showed up in the 2015 International Plastic Exhibition that held in May 20th to 23th in Guangzhou. DSM mainly displayed its research in the electronic, automotive, packaging, consumer and industrial products, and also series of solutions for mobile devices and high temperature applications: the latest Stanyl® Diablo HDT2700 and Akulon® Diablo HDT2500.

[Veolia Water Is Authorized to Provide Water Services for the Largest Nuclear Power Plant in Korea](#)

Korea Hydraulic Nuclear Power Company, the fifth largest nuclear power supplier around the world, authorized Veolia Water to provide a three-year operating and maintenance services for Kcri nuclear power plant as Korea's largest one. The service contract covers all plant water supply: desalination and treatment of rain water to supply steam production pipe; electrolytic chlorination of seawater to supply the power plant's cooling system.

[DeTao Group Has Issued "Integrated Report: Disclosure of Enterprise under China's New Normal"](#)

Recently, Mr. Li Zhuozhi, president of DeTao group, and professor Rebert Eccles in Harvard business school jointly issued an article "Integrated Report: Disclosure of enterprise under China's New Normal". The article puts forward that the enterprises should use the "integrated report" as the company's disclosure tool, in order to improve their own capacity to better cope with the "New Normal".

["Seize the New Normal, Broaden the New Horizons". Eaton Win the UPS Customer Satisfaction Survey Award](#)

On May 20th, "the Eleventh UPS Power Supply System and Its Infrastructure Technology Summit & Customer Satisfaction Survey Conference" was held in the national conference center in Beijing. As the global leading power management company in UPS industry, Eaton won three awards, including "Technology Innovation", "Customer Satisfaction Service" and "2014 UPS Application Top 10 Brand", due to excellent product technology and service.

[Huaxin Cement Has Issued the "2014 CSR Report"](#)

On May 15th, Huaxin Cement issued its "2014 CSR Report". It is the eighth CSR report issued by this company. The report includes corporate governance, environmental protection responsibilities, security responsibilities, personnel training and serve the society etc., which fully shows specific practices and outstanding performance on CSR of Huaxin Cement.

[The Party Central Committee and State Council Formally Announce the Publication of “Opinions on Accelerating Ecological Civilization Construction”](#)

On May 6th, the Party Central Committee and the State Council formally announced the publication of “Opinions on accelerating ecological civilization construction”. The “Opinion” made clear requirements and guidance to accelerate the ecological civilization construction from nine aspects, including the general requirements, strengthening the main body function orientation, optimizing national spatial development pattern, promoting technological innovation and structural adjustment; improving the quality and efficiency of development; promoting comprehensively saving and highly efficient recycling of resources; promoting the fundamental change of utilization way, intensifying the natural resource and environment protection; improving the ecological environment quality; perfecting the ecological civilization system; strengthening the statistical monitoring and law enforcement supervision of ecological civilization; accelerating the formation of good society fashion and strengthening the organizational leadership.

Integrated Reading: [Interpretation on “Opinions on accelerating ecological civilization construction” by five ministries.](#)
[Interpretation on “Opinions on accelerating ecological civilization construction” by Mr. Xie Zhenhua](#)

[NDRC: New Urbanization Construction Will Implement “One Integrated & Two New” Project](#)

In the key working meeting on deeply implementing the state new urbanization construction held recently, NDRC indicated that it will implement the “One Integrate, Two New” Project this year, which means making a new breakthrough in the process of the migrant workers’ blending in the town, the cultivation of new small and medium-sized cities and new urbanization construction. Mr. Xu Shaoshi, director of NDRC, showed that new urbanization construction is the multiplier for consumer demands and also the accelerator for investment demands. It is a comprehensive platform to promote the entrepreneurial innovation and deepen the reform. It should give full play to the new urbanization with gold combination role of steady growth and structure adjustment, and put it in the more prominent position.

[Mr. Qiu Baoxing, the Former Deputy Minister of MOHURD: Urbanization Should Hold on to Five Bottom Lines](#)

On May 24th, in the third Urban Development Forum, Mr. Qiu Baoxing, former deputy minister of MOHURD showed that urbanization is an period that the state resource using is unprecedented in any countries and we should hold on five bottom lines during the urbanization. (1) We should adhere to the coordinated development between big-medium-small cities and towns; (2) We should adhere to the coordinated development between cities and countries; (3) We should adhere to the compact density of urban space; (4) We should prevent the appearance of empty city; (5) We should protect the cultural heritage.

[MIIT Will Establish Waste Tyres Recycling Demonstration Project](#)

For the sake of accelerating the application of advanced technology and product promotion in the renewable resources industry and exploring the new mechanism for the renewable resource industry development, MIIT made an announcement recently to organize to construct a group of resource recycling demonstration projects. The projects include iron and steel scrap, scrap non-ferrous metals, waste tires, waste plastics, waste oil, waste textiles, construction waste, waste electric and electronic products, automobiles and other resources recycling.

[CBCSD and WBCSD Jointly Carry Out the Tire Industry Project \(TIP\)](#)

In 2015, WBCSD and CBCSD continue to jointly promote the tire industry project (TIP) and held several seminars with CTRA, sharing the successful experience of waste tire pyrolysis in China, putting forward China's tire industry chain optimization policy and technical advice, and improving the resource utilization efficiency of waste tires.

[“2015 China’s Small and Medium-sized City Development Report Green Book” Is Launched in Beijing](#)

“2015 China’s Small and Medium-sized City Development Report Green Book”& the 11th New Quality Evaluation System Research of Small and Medium-sized City’s Scientific Development and New Urbanization was launched in Beijing recently, which was jointly held by Urban Development and Environment Institute of CASS, Development of Northeast Asia Research Institute, Small and Medium-sized City’s Economic Development Commission of China’s Urban Economic Society. It officially launched its achievements. The sample list city has been publicly displayed in the website of China’s Small and Medium-sized City, and it enters a new stage of data verification, on-site investigation and case summary.

[The “Transformation Development of Building Materials under New Trends” Forum Is Held in Beijing](#)

On May 20th, at the Building Materials Transformation Development Forum under New Trends, which sponsored by the municipal green building association and Jianhua Building Material Group, industry representatives put forward that the green building product upgrading perhaps will become the breakthrough of building material industry. Since January 1th this year, the national “Green Building Evaluation Standard” has been implemented officially. It expands the rules for the public buildings in the original standard to the field of civil construction, and thinned the green building assessment division with coving the whole life period of the building.

[The World Business Summit on Climate Change Held in Paris](#)

On May 20th to 21th, the World Business Summit on Climate Change was held in UNESCO headquarters in Paris. Nearly thousands of business leaders, investors and policymakers from many countries got together, explored the climate change and sustainable development solutions from the global level, promoting low carbon economic upgrade into the enterprise actions. Around the issues of "promote low carbon construction solutions" and "policy guidance for realizing the low carbon society" respectively, the two-day summit shared the enterprises' practice experience and advice on promoting the low carbon economy transformation, to help the government make more reasonable policy to realize the carbon reduction goal while ensuring economic growth and promoting employment, which will paved the roadbed for reaching a blinding agreement in Paris Climate Conference.

[China and South Korea Officially Signed Free Trade Agreement](#)

On June 1th, China and South Korea officially signed the "People's Republic of China government and government of the republic of Korea free trade agreement". This is the biggest trading agreement China had signed so far with widest issue range and highest trade value. The two countries will also deepen their cooperation in the new energy, air pollution and climate change fields, and provide new market growth opportunities for each other.

[CBCSD and KBCSD Jointly Cooperate to Promote the Business Sustainable Development in Two Countries](#)

In July 15th to 16th this year, CBCSD and KBCSD will held the first "China-Korea CEO Roundtable on Business Sustainable Development" in Beijing, which aims at setting up an regular exchange platform for the business leaders, government officials and other like-minded partners, to explore cooperation opportunities in the low carbon and green business field.

[CBCSD and Green Footprint Center Jointly Launch Building Environmental Performance Pilot Project](#)

Recently, CBCSD and green footprint center officially signed a cooperation agreement that the two sides will jointly launch environmental performance pilot project.

CBCSD will introduce the environmental management platform widely used in North America and other regions and apply the innovative methods and practices to set up the building performance benchmarking. This project aims at promoting the development of a localization "Building Energy Efficiency Management Platform", strengthening the building efficiency management, and helping more owners understand their buildings' energy consumption.

[China and India Issued Joint Statement on Climate Change](#)

On May 15th, China and India issued the joint statement on climate change in Beijing, which declares that the two countries are sparing no effort to prepare the contribution related to the 2015 agreement which decided by their respective country, endeavouring to summit to the Paris Conference as soon as possible. The two sides will fully support the success of the Paris Conference hold in the end of this year.

[The International Low-carbon Forum is Tentatively Scheduled in June](#)

The third Shenzhen International Low-carbon Forum is tentatively scheduled in June 17th to 18th. It mainly consists of open ceremony, main forum, sub-forum and related activities. The theme of main forum is "Coordination and Management of different stakeholders under the same goal". There are 11 sub-forums including low carbon city mayor summit, new energy, low carbon industry and tsubochi. Related activities include low carbon model selection and prize, creative design award, etc.

Low-carbon Development, Energy and Climate Change

[State Council: "2014-2015 Action Plan for Energy Conservation, Emission Reduction and Low-Carbon Development" Issued on May 26th](#)

The general office of the state council issued the "2014-2015 action plan for energy conservation, emission reduction and low-carbon development" on May 26th., which further solidifies the carbon reduction targets, quantifies tasks and strengthens measures of the energy conservation and emissions reduction .By 2015, energy conservation and environmental protection industry output value is estimated to reach 4.5 trillion yuan RMB."Action plan" put forward the specific carbon reduction goals of energy conservation and emissions reduction: from 2014 to 2015, the GDP energy consumption per unit, chemical oxygen demand (COD), sulfur dioxide, ammonia nitrogen and nitrogen oxide emissions per unit decreased respectively by 3.9%, 2%, 2%, 2% and 5% yearly, the GDP carbon emissions per unit decreased respectively by 4% and 3.5% for the past two years. The government will take measures from eight aspects: (1)Vigorously promote the adjustment of industrial structure;(2) Speed up the construction of energy conservation, emissions reduction and carbon reduction projects; (3) Promote energy conservation and carbon reduction in the key fields; (4) Strengthen technical support; (5) Further strengthen policy incentives; (6) Actively promote market-oriented mechanisms on energy conservation and emissions reduction; (7) Strengthen monitoring, alarm, supervision and inspection;(8) Fulfill the targeted responsibility.

[Beijing-Tianjin-Hebei Cross-regional Carbon Trading Market Being Developed](#)

Beijing-Tianjin-Hebei Region is currently exploring to establish cross-regional carbon trading market. Last year, Beijing and Hebei started the development of the first cross-regional carbon emissions trading market in the country. Since Chengde is the first pilot in Hebei province, all the key emitters included in the carbon trading system in Chengde will also participate in the Beijing market's carbon emissions trading. In addition, the NDRC with the relevant departments have jointly made the research study on the ecological environment protection planning of Beijing-Tianjin-Hebei coordinated development, which will be issued formally after approval.

[The "National Wise Energy Public Service Cloud Platform" Is Online](#)

Recently, the "National Wise Energy Public Service Cloud Platform" was officially online during the "China Energy Internet Forum". It provides a user-friendly information platform on energy cross sectors and regions nationwide. It is an smart energy management platform and database built according to the ISO/IEC/IEEE 18880 standard, in order to realize national energy data integration, to organize the public resources, and to provide functions including data storage, real-time monitoring, visual management, data analysis, risk control, efficiency analysis, etc.

["Internet+Recycling" Model of Renewable Resources Is Worth Exploring](#)

It was made clear in the "2015 Circular Economy Promotion Plan" that China will promote and lead the innovation of recycling model of renewable resources, explore the model and path of "Internet + Recycling", and support the development of new recovery methods such as smart recovery and auto-recovery machine. According to the plan, the main resource production will increase by 15% and the resources recycling industry output value will reached 1.8 trillion yuan RMB by end of the "Twelfth Five-Year Period". However, the recovery system construction is still the weakest along value chain of the national comprehensive utilization industrial sector.

[NEA Will Construct the Solar Power Standardization Technical Committee](#)

On May 25th, the National Energy Administration issued the "Notice for Consultation on Establishing Solar Power Technical Panel under the Energy Industry Standardization Committee". According to the requirements in the "Energy Industry Standardization Technical Committee Management Regulations" (On Trial)", the NEA will call for public advices on establishing the solar power technical panel under the energy industry standardization committee.

["Urban Household Garbage Management Assessment Report" Published in Beijing](#)

The "Urban Household Garbage Management Assessment Report" was published in Beijing on May 5th by the institute of the national development and strategy, Renmin University of China. It put forward a series of assessments and suggestions according to the "Four-in-one" subjects of urban household garbage management, including hazard-free treatment, reduction, recycling and cost decrease under harmless premise.

[Global Top Oil Producer Saudi Arabia: Fossil Energy Will Become History Around 2050](#)

Mr. Ali Al-naimi, oil minister of the global largest oil exporter Saudi Arabia, said on Thursday that Saudi Arabia may weed out fossil fuel around 2050, and Saudi plans to make a transition into a big economy of solar and wind energy in the future. He also said that, Saudi may start to export electricity in a few years time in replacement of fossil fuel.

[2015 China's Energy Strategy Investment Forum Held in Beijing](#)

"2015 (11th) China's Energy Strategy Investment Forum" was held in Beijing, with the theme "One Belt One Road Strategy: Energy Investment Opportunities". In this forum, the invited government officials, experts and scholars in the energy industry, corporate executives and unconventional oil and gas industry association members got together to discuss the energy investment opportunities in the "One Belt One Road" roadmap.

[Hanergy Showed Clean Energy Center in Olympic Forest Park](#)

On May 20, Hanergy open sits clean energy exhibition center in Beijing Olympic forest park, featuring displaying the origin of the earth's energy by video, thin-film solar power generation technology applied to wearable devices, and mobile energy Internet demonstrated by light and shadow effects. The center opens to the public freely, popularize knowledge of renewable energy, as well as promote mobile clean energy products.

Corporate Social Responsibility

Mr. Li Keqiang: Enterprises Should Unite When Going Overseas

On the morning of May 23th, Premier Li Keqiang raised three hopes to the Chinese enterprises presented in the Symposium of Chinese Companies in Peru: (1) Promote the transformation and upgrading of industries of China and Peru through cooperation on capacity.(2) Shoulder social responsibility well; (3) Strengthen the coordination and synergy for business overseas.

Mr. Li Keqiang said that, in the process of going out, facing all the regional cultural differences and all kinds of risks, companies must unite and prevent vicious competition.

“Regulation on Corporate Safe Production Responsibility System - Five Implementations & Five Must-dos” Released

The State Administration of Work Safety established the “Enterprise Regulation on Corporate Safe Production Responsibility System - Five Implementations & Five Must-dos i”, so as to implement in-depth of Xi Jinping’s message on occupational safety and the national teleconference on occupational safety, for the all-round implementation of the new “Safety Production Law”, and for further improving the safe production responsibility system and strengthening corporate safety production responsibility implementation.

SASAC Issued 25 Advices on Local State-owned Assets Commitees, Demanding the State-owned Enterprises to Better Fulfill the Social Responsibility

The “2015 SASAC Work Plan for Guide and Supervise the Local State-owned Assets” was issued recently by the SASAC, in which 25 specific guidance were put forward, including drafting and disseminating the guidance on state-owned enterprises to fulfill social responsibility, strengthening corporate social responsibility legislation research work, and holding the social responsibility work meeting of central enterprise and the local state-owned asset committees.

Qilu Petrochemical Released Its First CSR Report

Qilu Petrochemical CSR report was officially released on May 26th for the first time. It is the first “CSR White Paper” released by this company since its establishment nearly 50 years ago. During the Twelfth Five-year Period, Qilu Petrochemical had saved 15.8 million tons of standard coal, equivalent to plant 351.9 million trees. It reduced 38.87 million tons of carbon dioxide emission, equivalent to saving the emissions of 11 million economic-cars for one year. It had also saved 227 million cubic meters of water, which is equivalent to the water amount of 16 West Lake.

15 Coal Enterprises Launched the CSR Reports Jointly

On May 12th, the 2015 Coal Industry CSR Report Launch Event was held in Beijing. 15 Coal enterprises including Shenhua Group, China Coal Energy Group, China Coal Geological Bureau, Kailuan Group, Shannxi Coal Chemical Group etc, launched their CSR reports together.

企业安全生产责任体系 五落实五到位规定

安监总办〔2015〕27号

5落实 luoshi

- 1 必须落实“党政同责”要求，董事长、党组织书记、总经理对本企业安全生产工作共同承担领导责任。
- 2 必须落实安全生产“一岗双责”，所有领导班子成员对分管范围内安全生产工作承担相应职责。
- 3 必须落实安全生产组织领导机构，成立安全生产委员会，由董事长或总经理担任主任。
- 4 必须落实安全管理力量，依法设置安全生产管理机构，配备注册安全工程师等专业安全管理人员。
- 5 必须落实安全生产报告制度，定期向董事会、业绩考核部门报告安全生产情况，并向社会公示。

International Cooperation and Global Trend

[The Second Sustainable Energy Forum of United Nations Held](#)

The second United Nations Forum on Sustainable Energy for All opened in New York on May 18th. Delegates from government, business and NGO announced the new Energy Action Commitment in this forum, and they will take action to eliminate the energy scarcity and address climate change. The four days forum mainly discussed the financing and investment scale needed to realize the goal of energy, energy efficiency and renewable energy plan. Over 1000 practitioners shared their innovative energy solutions.

[China Signed the New International Energy Charter Declaration](#)

On May 29th, NurBekri, Deputy Minister of NDRC and Chief of the NEA, recently led a delegation to attend the energy charter ministerial meeting held in Hague, Dutch. He signed the new international energy charter declaration on the behalf of China. It marks that China have transformed from the invited observer countries into participating observer countries, which is a new step on the way of international energy governance.

[Experts from China-Japan-Korea Discuss the Circular Economy Cooperation and Development in Tianjin](#)

On May 29th, the first China-Japan-Korea Circular Economy Forum was held in Tianjin. Experts from three countries got together to discuss the cooperation and development in the Circular Economy Field. Currently, Japan and Korea in East Asia had established a comparatively perfect recycle system, which can be of reference for China. In recent years, Korea continuously strengthened the "Producer Recycling System", discharged the producer's responsibility to recycle and reclaim the end-of-life products and established the corresponding incentive system. Korea could strengthen the communication with China and help China to establish the related systems.

[British Chinese Energy Association Held the Chinese Corporate International Energy Cooperation Workshop](#)

Recently, British Chinese Energy Association (BCEA) Held the Chinese Corporate International Energy Cooperation Workshop in London. The participated experts believed that the overseas oil & gas assets buyout by Chinese oil companies dropped sharply, but the "One Belt One Road" idea creates a favorable environment for Chinese oil companies to buy overseas energy assets and develop further cooperation in energy field with other countries and regions.

[China and Sweden Deepened the Transportation Cooperation to Promote the Sustainable Development](#)

On May 16th to 19th, Yang Chuantang, Minister of Transport, visited Sweden and hold a work meeting with Anna Jonathan, Minister of Sweden Business and Innovation Infrastructure Ministry. They exchanged their views on the transportation development policy and on deepening the future cooperation. After the meeting, they signed a new cooperation MOU between the two parties and witnessed the second project signing ceremony of China-Sweden Transportation Safety Research Center.

[The International Biodiversity Day May 22th: Promote the Sustainable Development](#)

May 22th is the international biodiversity day. The United Nations determined the theme of the international biodiversity day this year as "Biodiversity Promote the Sustainable Development". U.N. secretary-general Ban Ki-moon delivered a speech at the international biodiversity day, he said that a variety of life on earth is the key to guarantee the offspring well-being, and it helps to solve a wide range of social problems to maintenance, recovery and use the biodiversity in a sustainable way.
